Mylan’s Epinephrine Auto-Injector Offerings to Enhance Patient Access

**Mylan has programs in place to help enhance access to epinephrine auto-injectors for patients at risk for anaphylaxis, a potentially life-threatening allergic reaction.**

### $300 My EpiPen Savings Card®

**Available for commercially insured patients purchasing the branded product**

For commercially insured patients, the My EpiPen Savings Card® covers up to $300 for each EpiPen 2-Pak® per prescription, up to six EpiPen 2-Pak® cartons per year. The savings card will act as cash at the pharmacy. For example, if a patient’s cost after insurance is $150, the card would cover the entire amount. For patients with an out-of-pocket cost of more than $300, it would cover $300.

To download the card and review full terms and conditions, visit epipen.com/savings.

### Generic of EpiPen® (epinephrine injection, USP) Auto-Injector

**Available for all patients**

Mylan is planning to launch the first authorized generic to EpiPen® Auto-Injector at a list price of $300 per generic EpiPen® two-pack carton, which represents a discount of more than 50% to the Mylan list price, or wholesale acquisition cost (“WAC”), of the branded medicine. The device functionality and drug formulation will be identical to the branded medicine.

Mylan intends to distribute the authorized generic as it would any other generic medicine working with all parts of the generic drug value chain. Once launched, the product will be available in pharmacies, just as any other generic would be. Savings for the patient will be determined by their healthcare insurance coverage.

The patient assistance program also covers underinsured patients whose pharmacy coverage is limited to generics.

To determine if you qualify, visit epipen.com or contact Mylan Customer Relations at 800-395-3376 or customer.service@mylan.com.

### Patient Assistance Program

**Available for uninsured and underinsured patients**

Mylan’s patient assistance program will cover epinephrine auto-injector costs for those earning up to 400% of the Federal Poverty Level.

**Indications**

EpiPen® (epinephrine injection, USP) 0.3 mg and EpiPen Jr® (epinephrine injection, USP) 0.15 mg Auto-Injectors are for the emergency treatment of life-threatening allergic reactions (anaphylaxis) caused by allergens, exercise, or unknown triggers; and for people who are at increased risk for these reactions. EpiPen® and EpiPen Jr® are intended for immediate administration as emergency supportive therapy only. Seek immediate emergency medical help right away.

**Important Safety Information**

Use EpiPen® or EpiPen Jr® Auto-Injectors right away when you have an allergic emergency (anaphylaxis).

Get emergency medical help right away. You may need further medical attention.

Please see additional Important Safety Information on next page.
Important Safety Information, continued

Only a healthcare professional should give additional doses of epinephrine if you need more than two injections for a single anaphylactic episode. EpiPen® or EpiPen Jr® should only be injected into the middle of your outer thigh (upper leg), through clothing if necessary. Do not inject into your veins, buttocks, fingers, toes, hands or feet. Hold the leg of young children firmly in place before and during injection to prevent injuries. In case of accidental injection, please seek immediate medical treatment.

Rarely, patients who have used EpiPen® or EpiPen Jr® may develop an infection at the injection site within a few days. Some of these infections can be serious. Call your healthcare professional right away if you have any of the following at an injection site: redness that does not go away, swelling, tenderness, or the area feels warm to the touch.

Tell your healthcare professional about all of your medical conditions, especially if you have asthma, a history of depression, thyroid problems, Parkinson’s disease, diabetes, high blood pressure or heart problems, have any other medical conditions, are pregnant or plan to become pregnant, or are breastfeeding or plan to breastfeed. Be sure to also tell your healthcare professional all the medicines you take, especially medicines for asthma.

If you have certain medical conditions, or take certain medicines, your condition may get worse or you may have longer lasting side effects when you use EpiPen® or EpiPen Jr®.

Common side effects include fast, irregular or “pounding” heartbeat, sweating, nausea or vomiting, breathing problems, paleness, dizziness, weakness, shakiness, headache, feelings of over excitement, nervousness or anxiety. These side effects usually go away quickly if you lie down and rest. Tell your healthcare professional if you have any side effect that bothers you or that does not go away.

Please see the full Prescribing Information and Patient Information.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
